10-420	<p>Router Boss 420 Standard</p> <p>All Router Boss machines provide an unprecedented level of control and versatility in routing wood. Because you are not constrained in the bits you can use or cuts you can make, you can focus on the creative and aesthetic aspects of woodworking. The machine controls both the router and the wood and offers a power feed capability with a 42" sliding bar. Scales, cursors and stops provide a precise means of positioning cuts. Safety features and advanced technologies are fully integrated.</p>	\$795	
10-470	<p>Router Boss 470 with Digital Option</p> <p>Same features as Router Boss 420, except with an extended 47" sliding bar work holder plus a built-in electronic digital scale that measures movement of the sliding bar and indicates cut locations with extreme accuracy. The large top-mounted LCD display reads either in mm, decimal or fractional inch.</p>	\$995	
10-360	<p>Router Boss 360</p> <p>Same features as Router Boss 420, except more compact with a 36" sliding bar work holder and without our front side magnetic dust chute.</p>	\$695	
12-240	<p>Plunge Assist Kit</p> <p>Makes depthing of the router a one-handed operation, leaving your other hand free to position the wood with Router Boss's power-feed. Provides enhanced plunge control that is excellent for mortising operations.</p>	\$45 DeWalt 625 \$55 Universal	
12-220	<p>Precision Stop</p> <p>Micro-adjustable stop that rides in our guide rail t-tracks. A quarter turn of the adjustment head equals 1/4 mm or 1/100". Provides a very precise adjustment to the fit of tenons and other joints. One precision stop is included in our accessory package deal.</p>	\$35.	
12-230	<p>Setup Gauge Bars</p> <p>3/4" wide brass gauge bars cut from key stock in 2 1/2" lengths. Set includes 1/16", 1/8", 1/4", 3/8" and 1/2" bars. Use gauge bars to eliminate measuring when setting stops or router plunge depth.</p>	\$20	
12-225	<p>Micro-Adjuster</p> <p>Provides a very fine adjustment to the position of the sliding bar work holder. With the micro-adjuster and our digital scale, you can easily position cuts along the sliding bar with .001" accuracy. Included with Router Boss 470.</p>	\$35	
12-250	<p>Mortise Table Kit</p> <p>31" by 7" t-track work holder that mounts 2 ways on the sliding bar and adds additional work holder capabilities. Mount horizontally for cutting on the face or edge of a board. Mount vertically for cutting on the end of a board or at a miter angle. The height and tilt is adjustable when mounted horizontally.</p>	\$250	
12-260	<p>Riser Plate with Fence (Router Table) Kit</p> <p>3/4" MDF riser plate plus a feather board, bristle brush and an attachable pair of fences that together increase the maximum depth of cut and provide router table capability for hand-feeding a work piece against the bit (profiling). Included in our accessory package deal.</p>	\$65

12-100	Special: Accessory Package Deal Save 10% with this bundle of popular Router Boss accessories. Includes Mortise Table Kit, Riser Plate with Fence Kit, a Precision Stop, Double Feather Board and a T-track clamp.	\$350	
12-280	Depth Gauge Kit 8" or 10" electronic digital scale with mm, decimal inch and fractional inch LCD display. Can be mounted to precisely measure either router plunge depth (DeWalt 625/Trend only) or router cross-cut position.	8" or 10" \$35	
12-300	Multi-angle Work Holder Kit Optional 15" wide work holder that can hold wood at single or compound angles up to 45° for mortising, tenoning, and other operations. For example, in cutting the angled tenons used in chair construction.	\$200	
13-625	DeWalt 625 Router This router fits the Router Boss perfectly. It has long been the industry standard in heavy duty plunge routers. It is solidly made, 3-HP, soft start and variable speed. It has a smooth plunging action that works well with our plunge assist bar.	\$295	
13-198	Eliminator Quick Change Chuck Enables cutters to be exchanged with ease without the use of wrenches. Instead of squeezing the collet fingers around the shank, it's patented locking system uses an eccentric cam, operated by a single 5/32" Allen wrench. Give it a twist and the bit is locked in place.	\$60	
17-130	Carbide Spiral Set Made in USA by Whiteside from solid carbide, this 3 piece up-cut spiral bit set (1/4", 3/8" and 1/2" widths) with long 1", 1 1/2" and 2" cutting lengths is best for cutting tenons, mortises and dovetail pins. All the bits have 1/2" shanks with an extra long 2" shank length that is best with Router Boss.	\$120	
17-140	Narrow Neck HSS Dovetail Set Made in USA from M4 PM high speed tool steel for extra toughness. Our maximum performance dovetail bits for natural wood. Includes two 8° bits and one 10° bit. All with 2" long 1/2" shanks. Use with wood up to 15/16" in thickness. The narrow necks provide a hand cut look. Made in USA.	\$65	
17-175	TCT Dovetail Set A boxed set of TCT (carbide tipped) dovetail bits that can be used with either real wood or man-made material up to 1 1/4" in thickness. Includes five 8° bits for through and drawer dovetails and two 10° bits for sliding dovetails. All have 1/2" shanks with 2" shank length. Made in Taiwan.	\$95	
17-200	Vertical Door Panel Bits For raised panel doors. All have 1/2" shanks with 2" shank length. By raising or lowering the bit you can adjust profile from 1" to 1 1/2" of reveal. Choose straight, ogee or convex profile. Made in Taiwan.	\$35 each \$100 set
